### **DETAILED ACTION**

Applicant's arguments, see paper, filed 4/30/07, with respect to the rejection(s) of claim(s) under 35 USC 112, 1<sup>st</sup> enablement have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made below.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24-39,42,44-47,70-76,78-82,86,91,96-99,117 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not describe the addition of fluorescent pseudomonad or bacteria in general to the composition disclosed in the instant method. Note, parts of the invention are clearly taught in the specification such as fluorescent pseudomonad having the ability to degrade essential oils and the application to soil, foliage, seeds and fruits a composition comprising an essential oil. However, again the specification does not clearly describe the addition of fluorescent pseudomonad or bacteria in general to the composition disclosed in the instant method.
